Address: 34 Second Avenue, Edenvale

Nationality: Zimbabwean

Gender: Male

Date Of Birth: 1996-05-15

Professional Summary

Full stack web developer with a passion for learning new technologies and working with teams to create user-friendly web applications. With about 2 years of building responsive web applications, I have experience in front-end and back-end development using technologies like HTML5, CSS3, Javascript, pure NodeJS and proficient knowledge in frameworks that include AngularJS, React.js, C#'s ASP.NET Core and CSS3's bootstrap framework to mention a few. My objective is to develop and design quality software that can provide effective business solutions.

Professional Experience

Cortexware: Junior Full Stack Developer   October 2020 - Present

- Built two e-commerce sites using pure NodeJS, Express and MongoDB for back-end then React.js for front-end. Both sites were integrated with stripe for payments.
- Developed and maintained a web application that manages crypto-currency using React.js, Firebase Cloud Storage and Tailwind CSS
- Developed an angular web application for health services in an agile environment using technologies like SQL Server for database, C#'s ASP.NET Core Web API(Swagger) for backend then Angular 13 for front-end.
- On the above application, I created a dynamic dashboard using Google Charts API to monitor user consumption of the platform.
- Developed a full stack project management system for a client using MERN stack technologies
- Built and maintained a full stack MERN car management system for a client using pure NodeJS, Express and MongoDB for back-end then React.js for front-end.
- Implemented unit testing using React.js' JEST framework and NodeJS's Mocha and Chai to ensure quality code before deployment.
- Built and maintained a beautiful front-end web application for a restaurant.
- Developed dynamic websites using HTML5, CSS3 and Javascipt.

- On Angular applications, I implemented microservices architecture to improve scalability of the system during code maintenance
- Deployed and maintained applications on Heroku, Netlify and Firebase.
- Refactored source code on Github according to client requests.

Professional Skills

Industry Knowledge:

- Front End Development with AngularJS and React.js.
- Back End Development with pure NodeJS, Express and C#'s ASP.NET Core Web API(Swagger)
- Use of CSS3's frameworks that are Bootstrap, Tailwind CSS and Google's Material UI
- Database management knowledge of SQL Server and MongoDB
- Comfortable with agile software methodologies mainly extreme programming.
- Source code maintenance using Github
- Individual task management using Trello and Monday

Languages, Databases and Frameworks:

- HTML5, CSS3, Javascript, NodeJS, Express, C#`s ASP.NET Core, React.js, Next.js,AngularJS, Bootstrap v5, Google Material UI, Tailwind CSS, SQL Server and MongoDB.

Education

British International College:

- Cambridge A` Level Certificate acquired in the year 2015.

University of South Africa:

- Higher Certificate in Economic and Management Sciences (98237) acquired in the year 2017
- Diploma in Information Technology(98806-ITE) acquired in the year 2019

Hyperion-Dev South Africa:

- Full Stack Web Development bootcamp to graduate in July 2022
